WATER

WHO'D HAVE THOUGHT DRINKING WATER COULD BE THIS GOOD?

Cool, purified chilled water, purified water at room temperature, hot water for a good cup of tea or coffee – all from one sleek, floor-standing or counter-top unit.

Point-of-use convenience and advanced manufacturing means no more lifting of heavy bottles, no more awkward empty bottles to store, and best of all no more hefty bills just to be able to provide your staff with chilled, refreshing water.

An activated carbon filter combined with optional internal ultraviolet lamp guarantees the best water you can get, rich in minerals, pure and clear makes the borg & overström the perfect point-of-use water dispenser for the office, factory, school or hospital environment, in fact anywhere where clean, chilled water is needed at the push of a button.

Model	Power?	Water?	Size	Weight	Drinks per Day
