

MICROBAR

BEAN TO CUP

THE SMALL MACHINE FOR BIG COFFEE DRINKERS...

For the true coffee-lovers we present the Microbar. If you want 'big machine' features in an attractive, compact unit then this is the machine you've been looking for. It's called the Microbar for a reason – because it's only 32cm wide and has all the gadgets and gizmos of a traditional bean-to-cup machine – except the price.

The Microbar has six drinks buttons, all of which can be programmed with your choice of drinks menu – whether it's cappuccino, espresso, Americano, cafe latte, latte macchiato or ristretto to name but a few. Whatever your choice, the Microbar grinds every cup fresh from the bean, and also has a separate ground coffee chute for decaff or single origin blends. Clear icons mark the hot water and steam buttons, for the teabag-dunkers or the Friday afternoon treat of a rich, frothy hot chocolate.

Titanium-coated coffee grinders and solid metal brewing chambers mean low maintenance and high reliability. An attractive neon-blue 2-line liquid crystal display communicates with you while the Microbar weaves it's magic and tells you when your drink is ready. The adjustable milk outlet ensures the perfect froth for cappuccino and latte, and is easily removed for cleaning.

With all these features maybe we should say the Microbar is truly the 'big machine' for the small (or not-so small) office instead???

Model	Power?	Water?	Size	Weight	Drinks per Day
Microbar	13A 3-pin plug	Hand-filled or Plumbed	480mm (h) x 320mm (w) x 450mm (d)	33kg	50+
