

NEVA B2C

BEAN TO CUP

GREAT COFFEE FOR LESS BEANS...

The Neva B2C is one of our most popular machines for many reasons, it's not just the state-of-the-art technology, reliability and ease-of-use that makes it a versatile and attractive machine, it's value for money price may also have something to do with it.

A ground-breaking yet simple brewing system combined with simple one-touch graphic drink selections produce strong, dark espresso, milky café latte, frothy Italian cappuccino and chocolatey mocha at the push of a button, all dispensed into either takeaway paper cups or your own china. The top warming plate not only pre-warms your own crockery but also offers an ideal solution for storing paper coffee-shop cups.

For the teabag dunkers there's a separate hot water outlet and a chocolate selection as a warming alternative to coffee. The Neva B2C is also able to dispense up to 120 drinks per hour, and will introduce a whole new experience into your office coffee menu. The Neva B2C can also be supplied with a range of accessories including matching base cabinet and Twinings tea stand.

With a Neva B2C in your office you need never visit the local coffee-shop again!
